(54) SYSTEM AND PROGRAM FOR PROCESSING BID DATA

(57)Abstract:
PROBLEM TO BE SOLVED: To provide a system and program for processing bid data, which enables each requester to process data gathering by reflecting his own or her own intention, when requirement data for purchasing products is aggregated with a plurality of requesters for the system of processing bid data.
SOLUTION: A system for processing bid data jockeys for position is equipped with a bid management function 11, which registers a proposed condition from a trader terminal 41 such that each bid proposal is feasible to be bid several times, and also provides requirement data for products being registered to the trader terminal 41 working as a supplier of the products; and a requirement management function 12, which registers the requirement data to be requested several times such that the requirement data is feasible to be changed for each bid proposal, and also provides the data for the registered proposed conditions to a requester terminal 31 that registers or changes the requirement data.
